EZ Confirm™

Shipping & Tracking Software

Expedite · Simplify · Enhance

The key to E Z Confirm is our proprietary software that connects your database to the USPS national tracking and verification system. It is feature-laden to facilitate your parcel preparation and tracking procedures.

Process
The software is easy to implement and highly flexible. Select to print the address sheet or label of your choice. Options include merchandise return labels when you need them.

Track
Tracking is multifaceted. Track directly on the internet via the E Z Confirm software or from your database. Track by recipient, company, location, customer reference number or USPS tracking number.
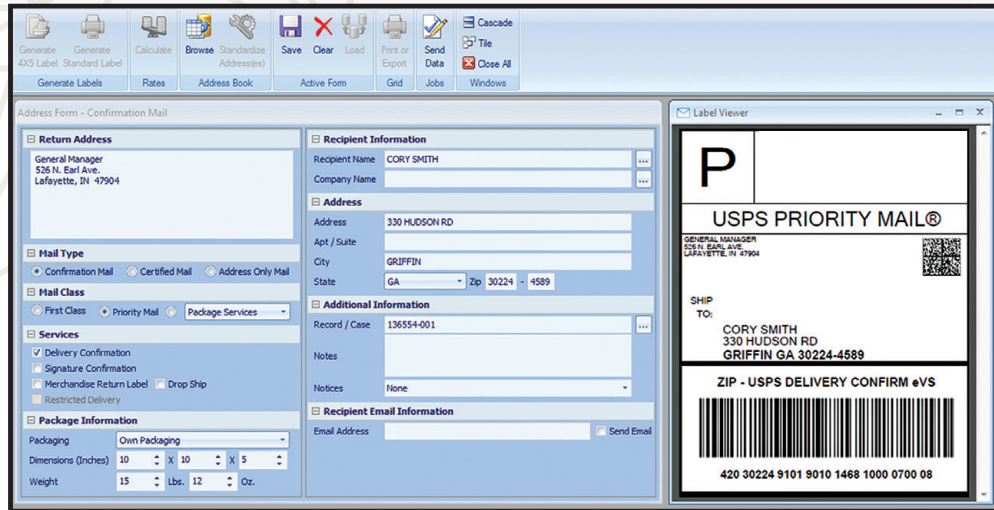

Manage
Manage recipient signatures via query and have them automatically emailed for easy print out or electronic storage.

The EZ Confirm™ Software:

- Installs on any PC and connects to multiple database types:
  - Enterprise Resource Planning
  - Customer Relationship Management
  - Warehouse/Shipping applications
  - Excel/SQL/Oracle and more
- Rapidly processes large volumes in automated environments
- Streamlines generation of shipping labels or mailing address sheets for
  - USPS Signature or Delivery Confirmation
  - USPS Certified Mail
- Maximizes information management with two-way integration
  - pull data from company system for addressing:
    - recipient
    - internal reference number
    - notice
  - push data back to your database:
    - USPS corrected address
    - USPS tracking number
    - Expected delivery date
    - Shipping Zone
    - Weight

Shipping & Tracking Software

The secret to the EZ Confirm Shipping & Tracking Software is the cloud. EZ Confirm is a web-based application that automates preparation and tracking for any eligible USPS parcel or mailpiece that requires tracking or a signature.

This desktop application seamlessly integrates your database with EZ Confirm and the *USPS Confirmation Services* tracking system.

Multifaceted Tracking Capability

- Track directly on the internet, via the software or from corporate database
- Track by recipient, company, location, customer reference or USPS tracking number
- Track by delivery event (Arrival at Postal Unit, Mailed, Delivered, In Transit, etc.)

Manage Signatures with AutoSignature™

- Signatures available via look up on case by case basis
- Signatures emailed daily for easy print out or electronic storage

Key Features:

- No maintenance or support required
- User ID/Departmental configuration
- Maintain data privacy (e.g., medical, financial, legal environments)
- Upfront address verification/correction with zip+4 assignment
- Return Merchandise Service - labels generated simultaneously
- Import/export tasks eliminated – direct visibility into company system
- Generate shipping labels or address sheets
- Configurable margins for various label stock
- System works behind the scenes in automated shipping environments
- Versatile batch processing/data extraction capabilities for mail-merge applications
